SUMMARY

Innovative and detail-oriented Full-Stack Developer skilled in crafting scalable, secure, and user-centric applications. Proficient in JavaScript, React, Node.js, MySQL, and Express.js. Certified Scrum Master with hands-on experience in Agile methodologies and project management. Passionate about solving complex problems, enhancing application security, and delivering responsive digital solutions using modern frameworks and tools.

EXPERIENCE

Software Engineering Professional Development

QuickStart Inc.

📅 2024 📍 Remote

Built secure and scalable full-stack applications using modern technologies. Worked in Agile teams to deliver responsive, high-quality solutions.

- Developed scalable full-stack applications using JavaScript, React, Node.js, and Express.js, with secure API integration and robust CRUD functionality.
- Delivered responsive user interfaces in React for seamless, cross-device user experiences.
- Created task management and quiz platforms with dynamic search, authentication, and efficient data handling.
- Applied Agile and Scrum methodologies to manage project timelines and team collaboration.
- Implemented secure coding practices, including encryption and access control, ensuring data integrity and protection.

Founder / CEO

Baj Enterprise LLC

📅 2022 - Present 📍 Fort Worth, TX

Launched and managed an Amazon e-commerce business, leveraging analytics to optimize product offerings, streamline workflows, and achieve consistent revenue growth.

- Increased sales by 10% through data-driven product optimization and enhanced customer engagement strategies.
- Reduced product costs by 18% by negotiating supplier relationships and improving procurement efficiency.
- Successfully implemented Agile project management principles to streamline operations and adapt to market trends.

Hospitality Professional

Evening Entertainment Group

📅 2016 - 2022 📍 Chicago, IL | Fort Worth, TX

Led teams in high-pressure environments, focusing on improving customer satisfaction, operational efficiency, and team performance.

- Managed and optimized service workflows, resulting in a 20% increase in sales and a 30% reduction in staff turnover.
- Trained and mentored new hires, enhancing team performance and cohesion.
- Executed successful events that drove a 25% increase in attendance and consistently exceeded client expectations.

SimpliLearn | 2024

PROJECTS

Task Management Web Application

📅 2024 📍 Remote

Developed a full-stack task management application with secure authentication and role-based access control, enabling users to create, assign, and track tasks.

Technologies: React, Node.js, MySQL, REST APIs

- Built a responsive front-end with React for seamless task management and user interactions.
- Implemented secure authentication and role-based access for user management and task assignments.
- Developed server-side logic with Node.js and MySQL to handle CRUD operations for tasks.
- Integrated REST APIs to enable efficient communication between the front-end and back-end.

Killer Knowledge App

📅 2024 📍 Remote

Built a dynamic quiz app allowing users to explore categories, test their knowledge, and add new questions for others to answer.

Technologies: JavaScript, Node.js, Express.js, MySQL

- Implemented a CRUD system for adding, editing, and deleting questions stored in a MySQL database.
- Enabled users to browse categories and take quizzes based on selected topics.
- Designed a scalable back-end architecture with Node.js and Express.js for efficient data handling.
- Integrated user-generated content, allowing real-time updates of new questions.

Animal Adoption Agency Website

📅 2024 📍 Remote

Designed and developed a responsive business website for an animal adoption agency, focusing on accessibility and user engagement.

Technologies: HTML, CSS, Bootstrap

- Created a mobile-friendly layout using Bootstrap, ensuring accessibility across devices.
- Designed intuitive user interfaces for browsing available animals and learning about adoption processes.
- Ensured website compliance with accessibility standards, enhancing the user experience for all audiences.

Search-Enabled Website

📅 2024 📍 Remote

Built a dynamic website with an integrated search engine, allowing users to search and filter data efficiently.

Technologies: HTML, CSS, JavaScript, MySQL

- Designed a user-friendly interface with HTML and CSS, focusing on intuitive navigation.
- Implemented search functionality using JavaScript and integrated it with a back-end MySQL database.
- Developed database queries in MySQL to efficiently retrieve and display search results.
- Optimized the website's responsiveness for both desktop and mobile devices.

STRENGTHS

Problem-Solving

Resolved complex technical challenges, such as building dynamic search engines and integrating secure APIs, to create scalable and seamless user experiences

Collaboration

Led Agile projects with cross-functional teams, delivering task management apps and quiz platforms on time and within scope, while using Scrum methodologies for efficient team collaboration.

Adaptability

Transitioned from a hospitality career to full-stack development, quickly mastering modern technologies like React, Node.js, and MySQL. Adapted to new tools like AWS and Docker to optimize project delivery and deployment.
